EXPERIENCE

General Assembly, Boston —*Web Development Immersive*

January 2018 - April 2018

Completed 600+ coding hours over the 13-week, intensive course. Developed full-stack applications with front and back end frameworks.

Featured Project: **Mechanic Mate**

- App for keeping track of vehicle maintenance
- Tech stack: Ember.js, Ruby on Rails, PostgreSQL
- GitHub: https://github.com/jal90/capstone-client

Featured Project: **Guitar Tracker**

- App for keeping track of guitar configurations
- Tech stack: JS + jQuery, Ruby on Rails, PostgreSQL
- GitHub: https://github.com/jal90/guitar-tracker

Boston University, Boston —*Stage manager/ sound engineer*

September 2012 - Present

Manage backstage and house for BU's dance theater - coordinating tech crew and dancers. Setup monitor systems and program soundboard for shows.

Self-employed, Boston — *Guitar Instructor*

September 2011 - January 2017

Instructed many students of all levels and ages guitar and music theory. Personalized lesson plans based on the needs and wants of the student. Enforced good practice for long-term benefit and avoiding injury.

EDUCATION

Boston University, Boston — *Bachelor of Music*

September 2009 - August 2013

Main studies focused on theory and history, with elective studies focused on African music, electronic music and jazz

SKILLS

Javascript

Ember

Express
